“ OEMs have begun differentiating between material costs and system costs.

- Peter Tackx, director Sales and Business Development, Polyscope Polymers B.V. Page 50

POLYSCOPE

fresh thinking, great products

FRESH THINKING, GREAT PRODUCTS

Polyscope is a world wide leading producer, seller and supplier of styrene maleic anhydride (SMA) copolymers and compounds.

It is a young, innovative and fastgrowing company.

Under the brand name XIRAN® Polyscope offers a broad range of SMA based plastics and specialty chemicals. The neat resins are available with very low and very high maleic anhydride content in a very broad molar mass range.

The compounds are impact modified and glass reinforced. It is Polyscope's ambition to be the preferred supplier of SMA based resins and compounds by optimizing value for all stakeholders.
