Job description

Title : Supply Chain manager USA
Location : To be defined (Michigan / Ohio / Pennsylvania)
Reporting to : Supply Chain director

Description Polyscope

Polyscope Polymers is a young, succesfull and fastgrowing chemical company producing Styrene Maleic Anhydride (SMA) polymers and SMA-compounds in the Netherlands, Belgium and the USA. The product are marketed all over the world in the engineering plastics (automotive, food packaging), building and construction, electronics and paper industry.

To build on the current success and due to its increased operations in the USA we are looking for a USA-based Supply Chain Manager.

Company culture

Open, informal, hands-on mentality

Job description

Being the USA Supply Chain Manager you are responsible for the Polyscope Supply Chain in the USA in the broadest sense. This includes:

- * production planning, raw material procurement for our production activities in the USA
- * inventory management for the locally produced and imported material
- * full customer order fulfilment incl. invoicing and accounts receivables follow up
- * transport and other logistic arrangements

You maintain a pro-active contact with the sales team and the customers. You are aware of all the commercial agreements and you support the sales team from the supply chain perspective with info about availability, operational capabilities and cost levels and you look for the most optimal set-up. You take care of the transparency of all relevant info and you maintain and develop for this purpose the existing systems.

You have to influence the commitments the USA-sales team makes towards the customers and you have to secure that the organisation is able to live up to these promises.

In this responsibility you maintain a very close contact with the production locations, the raw material suppliers and the third party logistic service providers in order to adapt their activities to the daily changing needs.

Being a member of the overall Polyscope supply chain team you are closely connected to the Supply chain office in Geleen-Netherlands in order to integrate the USA-supply chain in the overall optimization.

Job-demands:

- Academic level; preferably BS in logistics and supply management or similar. Having Masters additionally would be considered as an advantage.
- Minimum 3 years work experience and/or relevant internship experience.
- Experience with the supply chain in a chemical production environment ;
- Experience with domestic and international logistic trade (import/export) ;
- Experience in a 'spider-in-the-web'- role
- IT-systems knowledge would be considered as an advantage.

Our preferred candidate has the right personality and hands-on mentality and is looking forward to take full ownership of the Polyscope Supply Chain in the USA.

Our ideal candidate is analytically strong, accurate, communicative strong, independent and pro-active. Furthermore he/she is able to prioritize in a very dynamic environment.

Our offering:

- Dynamic job;
- Competitive salary level incl. regular health care program.
- Employee of Polyscope's entity in the USA (not yet established)

Candidates can send their CV + motivation to:
